Paslode
Paslode Impulse IM90i Nailer

Paslode Impulse IM90i Nailer

The Paslode Impulse IM90i is the most powerful Impulse tool in the world. Unleash the power of a pneumatic tool with the versatility of an Impulse tool. No Hoses or compressors are needed. The IM90i has a wide range of first fix applications. Extreme temperatures are no problem for the IM90i. Thanks to the electronic fuel injection system, the IM90i will work in -15°C to +49°C. Cold morning starts are no problem, it will measure the ambient temperature and adjust the fuel dosage.

Tool Specification

Product code	B30090
Weight	3.7kg
Length	324mm
Height	380mm
Width	113mm
Fuel cell life	1250 Shots
Battery life	4000 Shots
Magazine capacity	42 nails (approx.)

Applications

- Framing
- Flooring
- Roofing
- Eaves
- Trusses
- Joists
- Decking
- Cladding

Paslode Impulse IM90 Fastening System

IM90i Fuel Cell

The new look IM90i fuel cell. It will deliver 1,250 shots per cell. An increase of 25% over previous fuel cell. It has a tapered can to help avoid vibrations and a rotation mechanism for self location in the tool.

IM90i RounDrive® Fasteners

Australian made RounDrive® nails, these nails have been designed by Paslode for use in the IM90i tool. RounDrive® uses an offset full round head nail. A round head nail that still allows for close paper collation. Ranging in size from 50mm to 90mm in length and 2.87mm to 3.15mm in diameter.

Power & Performance

An increase of power of 30% over previous models. Making this tool the most powerful gas nailer on the market

Optimised balance

The centre of gravity on the tool is located at the trigger. Increasing user comfort

Electronic Fuel Injection

The new electronic fuel injection delivery system allows the tool to have a working threshold of -15°C to 49°C. This will help reliability for early morning starts and high daytime temperatures. With constant active metering of the fuel

Low pressure actuation

Reduces the force needed to depress the tool. This design feature will help reduce operator fatigue

Rubber moulded hand grip

Providing increased user comfort and grip

Tool free depth adjustment

Provides precise dial control of nail depth

Lower probe with skew nailing teeth

Helps to bite into the timbers to ensure positive placement of the fastener

Removable rear-load magazine

In the unlikely event of a nail jam, this feature will help remove the fastener without the need for tools

On / Off Battery switch

A new development for the IM90i was the addition of a battery switch. It allows the battery to remain in the tool in an On or Off position

Belt hook / Rafter hook combination

Keeps tool secure and also off the ground while not in use
